UltraClear Cover

Superior protection – crystal clear imaging

Our UltraClear sterile transducer covers with adhesive provide a safe and reliable solution for clinical and surgical use:

- No gel under the cover required – eliminating bubbles and wrinkles for consistently clear ultrasound images.
- Telescopic folding – enables quick and fully sterile application.

Comprehensive sterile protection – reduces infection risk and protects both patient and expensive imaging equipment.

- Enhanced Sterility & Patient Safety
- Single-use, sterile-packed covers suitable for intraoperative procedures.
- Airtight material prevents contamination and ensures 100% sterility.
- Latex-free material protects patients with latex sensitivity.

- Meets ISO and CE standards, sterilized with ETO, and manufactured in a clean-room environment.

Guarding Your Equipment

- Provides full coverage from transducer array to connector.
- Easy-open pouch with clear instructions for correct transducer insertion.
- Prevents damage from unsafe alternatives (e.g. Tegaderm or non-medical adhesives) that can harm the transducer lens.

Designed for Performance

- Specially shaped to fit curved and abdominal transducers.
- Delivers optimal, distortion-free image quality
- Available in different lengths for flexible use across procedures.

Item no.	Product	Size	Pcs
ND-2502-SG	Secma UltraClear - incl.20 g	18x30 cm	50
ND-2500-SG	Secma UltraClear - incl.20 g	18x120 cm	50
